Summary

PROBLEM

CAMPUS PARKING IS INEFFICIENT
AND TIME-CONSUMING.

STUDENTS AND STAFF WASTE TIME
CIRCLING LOTS AND DEALING WITH
OUTDATED KIOSKS.

- AI-POWERED MOBILE APP THAT PREDICTS PARKING AVAILABILITY
- GUIDES DRIVERS TO OPEN SPACES
- ENABLES SEAMLESS IN-APP PAYMENT

SOLUTION

MANAGEMENT TEAM

Tyler Chaffee (CEO), Lucky Hughes (CFO), Violeta Meza (CMO), Brett Rankin (COO), Partner CTO.

Features that general parking apps don't have, like AI-powered predictions and easy payments that are designed to work on college campuses.

- Uses AI + edge/fog processing for real-time detection.
- Privacy-first architecture and university system integration for compliance and security.
- Less time spent on patrols, and chances to make money through daily and guest fees.

TECHNOLOGY

COMPETITORS:

GENETEC AUTO VU
T2 SYSTEMS
FLASH PARKING
PARKMOBILE

SMART PARK AI ADVANTAGE:
CAMPUS-SPECIFIC AI PREDICTIONS AND
SEAMLESS PAYMENTS

TARGET MARKET

Target: large U.S. college campuses (>10 K commuters).

Focus on SoCal Universities and branch out from there

Campus parking tech market $\approx$ \$170 M –\$500 M and growing 10 %+ annually (IMARC Group).

Expansion potential across U.S. universities and municipal lots

MARKETING & SALES

B2B sales to universities + B2C subscriptions to students/staff.

Campus ambassador programs, QR-code launch events, conference visibility.

Pilot-first sales approach drives adoption

Promotions will include free trials, launch events on campus, referral programs for early adoptes

CURRENT STATUS

Evaluate multi-campus
expansion Growth

Cal Poly Pomona
pilot in progress.

Incorporated as
Delaware C-Corp.
MVP complete

FINANCIAL PROJECTIONS

Year 1 Revenue \$113 K Net -\$14 K

Year 2 Revenue \$534 K Net +\$329 K

Year 3 Revenue \$2.25 M Net +\$1.74 M

Break-even $\approx$ 4,283 subscribers

NPV (25% Discount) = \$1,072,727

Internal Rate of Return (IRR) = 190%

Payback Period = 2 years

RISK FACTORS & SENSITIVITY ANALYSIS

Best Case Scenario (+30% revenue):

- Year 3 Revenue: \$2.9M
- Year 3 Net Income: \$2.4M

Worst Case (-30% revenue):

- Year 3 Revenue: \$1.6M
- Year 3 Net Income: \$1.1M

Key Risks:

- Campus adoption slower than projected
- Regulatory changes in data privacy
- Competition from established players

FINANCING SOUGHT

Seeking:

\$150K Initial seed funding

\$180K Second Seed funding

Product development (40 %)

Marketing (20 %)

Personnel (13 %)

Operations (17 %)

Reserve (10 %)

POTENTIAL FUNDING SOURCES

Funding Source	Eligibility / Purpose	Potential Amount
CPP Enterprises Pilot Budget	Smart campus pilot & data collection	\$50,000–\$100,000
CSU Sustainability Grant	Green technology & emissions reduction	\$100,000+
Cal trans Innovation Fund	Transportation efficiency pilot	\$50,000
Private Partnership (IoT/AI vendor)	Equipment sponsorship & data-sharing	In-kind or \$25,000+
Student Innovation Fund (CPP)	Research & development support	\$10,000–\$20,000

Smart Park AI makes campus parking simple with a great user experience.

With strong growth potential and a capable founding team, we're ready to scale fast.
